

✦ **HAVE YOU CONSIDERED** ✦

 **SECESSION** 

as the solution for ending tyrannical government at the Federal level?

If we seceded from the federal empire as our **DECLARATION OF INDEPENDENCE** announces to the world we have a God given right to do - in order to establish a government which better suits our needs and works for us, what would change?

1. We would still have our people.
2. We would still have our land and property.
3. We would still have our local and state governments, which are our servants and under our direct control.
4. We would still have our police force and national guard. (actually state militia!)
5. We would no longer have the bloated very costly, arrogant, inefficient Federal empire interfering in our communities and sucking away our resources for their nefarious ill conceived schemes.
6. We would enjoy much lower tax rates.
7. We would have local control of our schools.
8. We could control our health care system.
9. We would have, most importantly, the opportunity to control the supply of money and credit in our economy as opposed to the current system which gives privately owned banks the power to control our supply of money, credit, and set the interest rate in violation of our constitution.
10. We would have control of our elections and voter qualifications, our immigration policy and our prison system.
11. We would regain the freedom to express our Christian heritage and faith and the right to commemorate our heroes.
12. We would be free to make alliances with our sister states for mutual defence and trade as well as refraining from making entangling foreign alliances, which do not benefit our community.
13. We would regain control of our military forces and use our soldiers, sailors, and aviators to defend our homeland and refrain from sacrificing our young patriots for foreign interests.
14. We would, as our founders envisioned, regain the freedom and personal responsibility to run our own affairs and live and work in a law-abiding moral community.
